

100 Octane... Now Street Legal!

Street Legal and Environmentally Friendly

VP100™ is specifically engineered for high performance vehicles, CARB-approved and street legal throughout the U.S.! An unleaded 100 octane gasoline, VP100 contains no metal compounds so it won't harm catalytic converters or oxygen sensors. In any high performance vehicle - muscle car, sport compact, exotic or street rod, sportbike or cruiser - VP100 can help achieve optimum performance, whether naturally aspirated, turbo or supercharged.

Enables Optimum Performance, Allowing:

- Higher compression
- Advanced timing
- Increased boost for more power
- More powerful nitrous oxide systems
- Power assist for towing heavy loads

VP100™ can be blended with your local fuel to achieve your desired octane number. VP100 can be blended with 87 octane pump gas to offer more octane choices including 89, 91, 93 and 95.
